Introduction and methods

In spring and summer 2013, Wilder Research was contracted to conduct a survey of adults in five counties in Central Minnesota (Benton, Chisago, Mille Lacs, Sherburne, and Stearns) to learn more about their health status and health behaviors, as well as their perceptions of health concerns in their communities. The public health agencies in each of the participating counties, CentraCare Health System, and Albany Area Hospital and Medical Center all provided representatives to participate in the study's working group, which advised Wilder Research on the development of the survey instrument and data collection methods. This group also provided final approvals on project decisions.

Survey instrument

The survey instrument was designed by Wilder Research in collaboration with the Central Minnesota Community Health Survey working group. Previous community health surveys conducted by Wilder and other counties were also used as examples when designing the survey. The survey instrument was developed for paper self-administration and was conducted in English only. See the Appendix for the complete survey instrument.

Sample

We used address-based sampling, to ensure all households were included in the sampling frame regardless of their phone status. The sample was purchased from Marketing Systems Group. See Figure 1 for an illustration of the number of sampled addresses, number of completed surveys, response rate, and margin of error for each of the sampling areas.

Data collection

Sampled addresses were contacted three times by mail, using the "modified Dillman" method of survey mailing, whereby sampled addresses are sent an initial survey packet including a cover letter, survey, and postage-paid return envelope. After two weeks, all households that did not return their completed survey were sent a post card reminder. After an additional two weeks, all sampled households that still did not complete the survey were sent a final survey packet. Of note, the survey was conducted during winter and early spring in Minnesota. Therefore, caution should be used when interpreting the results, especially related to physical activity and consumption of fresh produce, as these measures vary by season. Seasonality should be taken into consideration when comparing these survey data to other data sources across time.

There was one exception to this mailing sequence in the Sherburne County portion of zip code 56304, which is in Reporting Area #1. The initial study sample mistakenly did not include sample from this area so a remedial follow-up mailing was sent to sampled addresses in this area. Enough sample was released in this case so that only one mailing of the survey packet was needed to obtain the desired number of completes to correct for the initial error.

Adults were randomly selected from within the sampled households using the "most recent birthday" method (asking the adult who most recently had a birthday to fill out the one survey for that household) to ensure gender balance in survey respondents.

Weighting and analysis

Survey data are weighted to produce reliable estimates of population parameters. Weighting also compensates for practical limitations of a sample survey, such as differential nonresponse and under-coverage. By taking advantage of demographic information about the target population, weighting can reduce the variability of survey estimates.

The weighting process entails three steps. The first step consists of the computation of *design* or *base weights* to reflect any differential selection based on number of adults in the sampled household. In the second step, base weights are adjusted so that the resulting weights can aggregate to reported totals for the target population. For this study, survey weights were calculated using the method of *Iterative Proportional Fitting*, which is commonly referred to as *Raking*. Finally, adjusted weights are put through a series of quality control checks to detect extreme outliers and to prevent any computational or procedural errors.

Given the sample size and the demographic composition of the adult population of the five county region, design weights were adjusted by age and gender. Survey data for these demographic questions included missing values. All such missing values were first imputed using a hot-deck procedure before construction of the survey weights. The data were weighted against the U.S. Census Bureau's March Supplement of the Current Population Survey (CPS) 2012.

Coding was completed to categorize responses to the open-ended questions. See the Appendix for the codebook.

1. Central Minnesota Adult Health Survey sample and respondents

Area No.	Reporting area (County and Zip Code)	Adult (age 18+) population of area[a]	Number of addresses sampled	Number of completed surveys	Response rate	Margin of error[b]
1	St. Cloud metro (56301, 56303, 56304, 56374, 56377, 56379, and 56387)	97,949	3,352	597	17.8%	5.9%
2	Stearns county whole	117,563	2,073	497	24.0%	6.5%
3	Stearns County "rural" (Stearns excluding 56301, 56303, 56374, 56377, and 56387)	44,970	1,200	289	24.1%	8.5%
4	Benton County whole	27,130	2,179	517	23.7%	6.3%
5	Benton County "rural" (Benton excluding 56304, 56379 and 56377)	9,485	1,200	315	26.3%	8.0%
6	Sherburne County whole	62,722	7,500	1,392	18.6%	3.8%
7	Sherburne County 55308 (Becker)	6,037	1,200	247	20.6%	9.0%
8	Sherburne County 55309 (Big Lake)	12,177	1,200	223	18.6%	9.6%
9	Sherburne County 55330 (Elk River)	19,076	1,200	243	20.3%	9.3%
10	Sherburne County 55398 (Zimmerman)	10,107	1,200	244	20.3%	9.2%
11	Sherburne County balance (Sherburne excluding 55308, 55309, 55330, and 55398, but including the Sherburne portion of 56304)	15,235	2,700	435	16.1%	6.9%
12	Chisago County	40,040	1,200	256	21.3%	9.0%
13	Mille Lacs County	19,482	1,200	268	22.3%	8.8%
All	**Five county region**	**266,937**	**14,152**	**2,930**	**20.7%**	**2.7%**

Talking points about the study methods

To assist the representatives from the participating public health agencies and health care systems in communicating with their stakeholders (including their Community Health Boards, other organizational leadership, the media, and the general public) about this study, the following "talking points" can be used to help explain the study methods:

■ This is a mailed survey. According to best practices in survey research (i.e., best response rate for lowest cost), we used a three-mailing sequence for all sampled households, which includes an initial survey packet, a reminder post card, and a final packet.

■ The survey was sent to a random sample of households in the five counties. All households had an equal chance of being sampled, regardless of their phone status (i.e., households without landlines were not excluded, and households with more than one phone were not more likely to be sampled).

■ The response rate for this survey is within the expected range for surveys using the three mailing sequence, and with no incentive offered for participation.

■ The survey data are corrected with post-stratification and design weighting, which are statistical techniques commonly used to adjust for nonresponse bias (whereby certain types of people are more or less likely to respond to surveys).

■ These methods ultimately produced a sample that is statistically representative of the adult population. (Because we obtained fewer completed surveys than was originally targeted, the margin of error has increased somewhat in each of the sampling areas. However, these data are still representative of the population.)

How to use this data book

The "area of focus" for this data book is Sherburne County. Data books using this same format have been developed for each of 13 reporting areas, which correspond to the reporting areas described above, as shown in Figure 1.

Please see the other data books in this series for more detailed information about these other areas. (Some summary information on some of these areas may be shown in this data book, as noted below). For every table in this data book, results are displayed for sub-groups of respondents from Sherburne County based on:

■ Gender including male and female

■ Age, including adults ages 18-34, 35-44, 45-54, 55-64, 65-74, and 75+

■ Highest level of education including less than high school diploma/GED, high school diploma/GED, some college or AA degree, and bachelor's degree or higher

■ Annual household income ranges including less than $20,000, $20,000-34,999, $35,000-49,000, $50,000-99,999, and $100,000 or more.

■ Household type, including single adults with no children, 2+ adults with no children, single adults with 1+ children, and 2+ adults with 1+ children

■ Totals for each of the five participating counties and the entire five county region

The columns in each table correspond to the response options respondents were given on the survey (see Appendix for the survey instrument). If a table presents a survey question with fixed response categories, each column indicates the percentage of respondents who gave that response to the question. Some answer categories are combined because of the low number of responses in those categories. The last column in each row of the table always presents the number of people (weighted up to the total population of the area) related to the percentages in that row. Some questions apply only to certain types of respondents (due to skip patterns in the survey). In these cases, the total includes only the proportion of residents in the area (weighted up from the number of respondents) for whom the question was applicable.

Some questions were open-ended, such that respondents wrote their own answers. Responses were grouped according to theme in order to reveal which trends are most notable. In some cases, respondents were allowed to provide more than one answer. The number of residents in the selected area that the percentages represent (based on the responses weighted up to the population level using inflationary weights) can be seen in each table. Where fewer than ten respondents submitted an answer fitting a particular theme, that theme is grouped with other answers in an "Other" category.

Entire five-county region	28.5%	59.8%	11.7%	265,240

[a] Note: The values in this table were based on respondent answers to survey questions 26, 27, and 28. Chronic drinking is defined for males of having 60 or more drinks in a 30 day period. For females, chronic drinking is defined as having 30 or more drinks in a 30 day period. "Drinking—not chronic, gender specific" is the percentage of respondents who drank in the last 30 days, but are not considered chronic drinkers (less than 60 drinks in a 30 day period for men and less than 30 drinks in a 30 day period for women). "No drinking" represents the respondents who reported not drinking in the past 30 days.

[a] *Body mass index, or BMI, is the measure of relative weight based on an individual's height and mass. An individual is considered to be underweight if they have a BMI of 18.5 or less, normal weight if their BMI is 18.5 to 24.9, overweight if 25-29.9, and obese if 30 or greater. BMI was calculated based on respondent answers to questions 37 and 38.*

ABOUT YOU

33. **What county do you live in?**

☐ Benton   ☐ Sherburne

☐ Chisago   ☐ Stearns

☐ Mille Lacs   ☐ Other, please specify: _____

34. What is your gender?

☐ Male ☐ Female

35. What is your age?

[   ]

36. How many adults (including you) and children live in your household?

Number of adults age 18 or older (including you): [   ]   Number of children under age 18: [   ]

37. About how tall are you without shoes?

[   ] feet [   ] inches

38. About how much do you weigh without shoes?

[   ] pounds

39. Are you a member of either of the following ethnic or cultural groups?   **Yes**   **No**

a. Hispanic or Latino/Latina ☐ ☐

b. Somali ☐ ☐

40. Which of the following best describe you? Please check all that apply.

☐ American Indian or Alaska Native   ☐ African native

☐ Asian or Pacific Islander   ☐ White

☐ Black or African American   ☐ Other: [   ]

41. Which of the following best describes your current relationship status?

☐ Married   ☐ Separated

☐ Living with a partner   ☐ Widowed

☐ Divorced   ☐ Never married

42. Have you ever served on active duty in the United States Armed Forces, either in the regular military or in a National Guard or military reserve unit?

☐ Yes ☐ No

43. What is the highest level of education you have completed?

☐ Less than high school   ☐ Associate's degree (2-year degree)

☐ High school graduate or GED   ☐ College graduate (4-year degree)

☐ Some college/vocational school   ☐ Graduate school and beyond

44. What was your household's total income from all earners and all sources in 2012?

☐ Less than $20,000   ☐ $75,000 - $99,999

☐ $20,000 - $34,999   ☐ $100,000 - $149,999

☐ $35,000 - $49,999   ☐ $150,000 or more

☐ $50,000 - $74,999

THANK YOU!

Codebook for open ended comments

Q4 & Q8 - Why did you not get or delay getting the medical care you thought you needed? Please check all that apply.

1 - The care I needed cost too much
2 - My co-pay was too expensive
3 - My deductible was too expensive
4 - My insurance did not cover it
5 - I did not have insurance
6 - I could not get an appointment
7 - I did not think it was serious enough
8 - I had transportation problems
9 - I did not know where to go (for Q8 only)

10 - Cost
11 - Previous medical bills weren't paid
12 - Trying to minimize health costs
13 - Other bills take priority

20 - Insurance policy or coverage difficulties
21 - Geographic regulations of insurance policy
22 - Technical problems (computer, database)
23 - Providers in insurance network are not accepting more patients

30 - Self-care
31 - Pain or ailment went away
32 - Diagnosis is always the same
33 - Wanted to try self-care before involving doctors
34 - Sought advice from friends or relatives in the medical profession/I work in the medical profession
35 - No longer sick by appointment
36 - Attend counseling
37 - Prayer or religious methods to curing sickness

40 - Scheduling/busy
41 - No time (general)
42 - Work or professional conflicts
43 - School or education conflicts
44 - Timing of ailment (e.g., during vacation, on weekend)
45 - Didn't know clinic schedule
46 - Appointment too far in the future

50 - Problems with medical staff
51 - Didn't like or trust medical staff
52 - Didn't think medical staff could help
53 - Disagreed with medical staff
54 - Medical staff refuses to treat specific condition
55 - Medical staff refused to treat respondent because of demographic characteristic (homosexual)
56 - Familiar with medical staff in personal life
57 - Fear of judgment from medical staff

60 - Problems with health care system
62 - Too much bureaucracy
63 - Too much money in medicine
64 - Problems switching between providers
65 - Unnecessary tests

70 - Fear of medical practices (general)
71 - Fear of diagnosis
72 - Fear of stigma

80 - Family issues
81 - No childcare
82 - Lack of support from family

90 - Other
91 - Non-responsive answer
92 - Mental health kept respondent from visiting doctor
93 - Too sick to visit doctor
94 - Didn't make time/lazy/didn't care

-8 - Don't know

Q10 - Why did you not fill at least one prescription? Please check all that apply.

1 - The medication I needed cost too much
2 - My co-pay was too expensive
3 - My deductible was too expensive
4 - My insurance did not cover it
5 - I did not have insurance
6 - I do not like taking medications
7 - I did not like the side effects
8 - I had transportation problems
9 - Pharmacy services are not available in my community

20 - Other concerns about side effects
21 - Worried about prescription interacting with other medications

30 - Self-care
31 - Did not need prescription medication
32 - Used over-the-counter medication
33 - Alternative/complementary medicine

40 - Problems with medical staff
41 - Didn't like or trust medical staff
42 - Advice from other medical staff against prescription

50 - Problems with health care system
51 - Too much bureaucracy/too much paperwork
52 - Too difficult to schedule a follow-up appointment

90 - Other
91 - Non-response answer

-8 - Don't know
-9 - N/A

Q13: Which of the following types of health insurance do you have? Please check all that apply.

1 - Health insurance or coverage through your employer or your spouse/partner, parent, or someone else's employer
2 - Health insurance or coverage bought directly by you or your family
3 - Indian or Tribal Health Service
4 - Medicare
5 - Medicaid, Medical Assistance (MA), or Prepaid Medical Assistance Program (PMAP)
