

## STATEWIDE AND REGION COUNTS OF HOMELESS PEOPLE

Every three years Wilder Research conducts a statewide study to better understand the prevalence, causes, circumstances, and effects of homelessness. The study includes face-to-face interviews with people throughout the state who meet the [federal definition of homelessness](#), and a count of homeless people.

This report provides numbers of homeless people counted on the day of the study, October 25, 2012. Counts include people staying in emergency and battered women's shelters, and transitional housing sites. These counts were reported by the housing providers. It also includes counts of homeless people found through outreach in non-shelter locations such as encampments, hot-meal programs, and other drop-in service locations that were interviewed for the study. This report does not contain estimates of the uncounted or unidentified homeless population.

Continuum of Care Regions

Geographic breakdowns are provided for the state as a whole, the 7-county metro area and Greater Minnesota, and the 7 Greater Minnesota Continuum of Care regions (housing planning areas designated by HUD) and the metro area counties.

Each geographic table contains breakdowns by age and shelter type.

1. Number of people counted in temporary housing programs and in non-shelter locations
2. Number of families counted in temporary housing programs and in non-shelter locations
3. Number of people in families
4. Number of people not in families
5. Total for tables 3 and 4
