Introduction and methods

In spring and summer 2013, Wilder Research was contracted to conduct a survey of adults in five counties in Central Minnesota (Benton, Chisago, Mille Lacs, Sherburne, and Stearns) to learn more about their health status and health behaviors, as well as their perceptions of health concerns in their communities. The public health agencies in each of the participating counties, CentraCare Health System, and Albany Area Hospital and Medical Center all provided representatives to participate in the study's working group, which advised Wilder Research on the development of the survey instrument and data collection methods. This group also provided final approvals on project decisions.

Survey instrument

The survey instrument was designed by Wilder Research in collaboration with the Central Minnesota Community Health Survey working group. Previous community health surveys conducted by Wilder and other counties were also used as examples when designing the survey. The survey instrument was developed for paper self-administration and was conducted in English only. See the Appendix for the complete survey instrument.

Sample

We used address-based sampling, to ensure all households were included in the sampling frame regardless of their phone status. The sample was purchased from Marketing Systems Group. See Figure 1 for an illustration of the number of sampled addresses, number of completed surveys, response rate, and margin of error for each of the sampling areas.

Data collection

Sampled addresses were contacted three times by mail, using the "modified Dillman" method of survey mailing, whereby sampled addresses are sent an initial survey packet including a cover letter, survey, and postage-paid return envelope. After two weeks, all households that did not return their completed survey were sent a post card reminder. After an additional two weeks, all sampled households that still did not complete the survey were sent a final survey packet. Of note, the survey was conducted during winter and early spring in Minnesota. Therefore, caution should be used when interpreting the results, especially related to physical activity and consumption of fresh produce, as these measures vary by season. Seasonality should be taken into consideration when comparing these survey data to other data sources across time.

There was one exception to this mailing sequence in the Sherburne County portion of zip code 56304, which is in Reporting Area #1. The initial study sample mistakenly did not include sample from this area so a remedial follow-up mailing was sent to sampled addresses in this area. Enough sample was released in this case so that only one mailing of the survey packet was needed to obtain the desired number of completes to correct for the initial error.

Adults were randomly selected from within the sampled households using the "most recent birthday" method (asking the adult who most recently had a birthday to fill out the one survey for that household) to ensure gender balance in survey respondents.

Weighting and analysis

Survey data are weighted to produce reliable estimates of population parameters. Weighting also compensates for practical limitations of a sample survey, such as differential nonresponse and under-coverage. By taking advantage of demographic information about the target population, weighting can reduce the variability of survey estimates.

The weighting process entails three steps. The first step consists of the computation of *design* or *base weights* to reflect any differential selection based on number of adults in the sampled household. In the second step, base weights are adjusted so that the resulting weights can aggregate to reported totals for the target population. For this study, survey weights were calculated using the method of *Iterative Proportional Fitting*, which is commonly referred to as *Raking*. Finally, adjusted weights are put through a series of quality control checks to detect extreme outliers and to prevent any computational or procedural errors.

Given the sample size and the demographic composition of the adult population of the five county region, design weights were adjusted by age and gender. Survey data for these demographic questions included missing values. All such missing values were first imputed using a hot-deck procedure before construction of the survey weights. The data were weighted against the U.S. Census Bureau's March Supplement of the Current Population Survey (CPS) 2012.

Coding was completed to categorize responses to the open-ended questions. See the Appendix for the codebook.

1.   Central Minnesota Adult Health Survey sample and respondents

Area No.	Reporting area (County and Zip Code)	Adult (age 18+) population of area[a]	Number of addresses sampled	Number of completed surveys	Response rate	Margin of error[b]
1	St. Cloud metro (56301, 56303, 56304, 56374, 56377, 56379, and 56387)	97,949	3,352	597	17.8%	5.9%
2	Stearns county whole	117,563	2,073	497	24.0%	6.5%
3	Stearns County "rural" (Stearns excluding 56301, 56303, 56374, 56377, and 56387)	44,970	1,200	289	24.1%	8.5%
4	Benton County whole	27,130	2,179	517	23.7%	6.3%
5	Benton County "rural" (Benton excluding 56304, 56379 and 56377)	9,485	1,200	315	26.3%	8.0%
6	Sherburne County whole	62,722	7,500	1,392	18.6%	3.8%
7	Sherburne County 55308 (Becker)	6,037	1,200	247	20.6%	9.0%
8	Sherburne County 55309 (Big Lake)	12,177	1,200	223	18.6%	9.6%
9	Sherburne County 55330 (Elk River)	19,076	1,200	243	20.3%	9.3%
10	Sherburne County 55398 (Zimmerman)	10,107	1,200	244	20.3%	9.2%
11	Sherburne County balance (Sherburne excluding 55308, 55309, 55330, and 55398, but including the Sherburne portion of 56304)	15,235	2,700	435	16.1%	6.9%
12	Chisago County	40,040	1,200	256	21.3%	9.0%
13	Mille Lacs County	19,482	1,200	268	22.3%	8.8%
All	**Five county region**	**266,937**	**14,152**	**2,930**	**20.7%**	**2.7%**

Talking points about the study methods

To assist the representatives from the participating public health agencies and health care systems in communicating with their stakeholders (including their Community Health Boards, other organizational leadership, the media, and the general public) about this study, the following "talking points" can be used to help explain the study methods:

■ This is a mailed survey. According to best practices in survey research (i.e., best response rate for lowest cost), we used a three-mailing sequence for all sampled households, which includes an initial survey packet, a reminder post card, and a final packet.

■ The survey was sent to a random sample of households in the five counties. All households had an equal chance of being sampled, regardless of their phone status (i.e., households without landlines were not excluded, and households with more than one phone were not more likely to be sampled).

■ The response rate for this survey is within the expected range for surveys using the three mailing sequence, and with no incentive offered for participation.

■ The survey data are corrected with post-stratification and design weighting, which are statistical techniques commonly used to adjust for nonresponse bias (whereby certain types of people are more or less likely to respond to surveys).

■ These methods ultimately produced a sample that is statistically representative of the adult population. (Because we obtained fewer completed surveys than was originally targeted, the margin of error has increased somewhat in each of the sampling areas. However, these data are still representative of the population.)

How to use this data book

The "area of focus" for this data book is Sherburne County, Elk River (55330). Data books using this same format have been developed for each of 13 reporting areas, which correspond to the reporting areas described above, as shown in Figure 1.

Please see the other data books in this series for more detailed information about these other areas. (Some summary information on some of these areas may be shown in this data book, as noted below). For every table in this data book, results are displayed for sub-groups of respondents from the Sherburne County, Elk River area based on:

■ Gender including male and female

■ Age, including adults ages 18-34, 35-44, 45-54, 55-64, 65-74, and 75+

■ Highest level of education including less than high school diploma/GED, high school diploma/GED, some college or AA degree, and bachelor's degree or higher

■ Annual household income ranges including less than $20,000, $20,000-34,999, $35,000-49,000, $50,000-99,999, and $100,000 or more.

■ Household type, including single adults with no children, 2+ adults with no children, single adults with 1+ children, and 2+ adults with 1+ children

■ Totals for each of the five participating counties and the entire five county region

The columns in each table correspond to the response options respondents were given on the survey (see Appendix for the survey instrument). If a table presents a survey question with fixed response categories, each column indicates the percentage of respondents who gave that response to the question. Some answer categories are combined because of the low number of responses in those categories. The last column in each row of the table always presents the number of people (weighted up to the total population of the area) related to the percentages in that row. Some questions apply only to certain types of respondents (due to skip patterns in the survey). In these cases, the total includes only the proportion of residents in the area (weighted up from the number of respondents) for whom the question was applicable.

Some questions were open-ended, such that respondents wrote their own answers. Responses were grouped according to theme in order to reveal which trends are most notable. In some cases, respondents were allowed to provide more than one answer. The number of residents in the selected area that the percentages represent (based on the responses weighted up to the population level using inflationary weights) can be seen in each table. Where fewer than ten respondents submitted an answer fitting a particular theme, that theme is grouped with other answers in an "Other" category.

GENERAL HEALTH AND HEALTH CARE

1. **In general, would you say that your health is:**
   ☐ Excellent   ☐ Very good   ☐ Good   ☐ Fair   ☐ Poor

2. **About how long has it been since you last visited a doctor or other health care professional for a routine check-up?**
   ☐ Within the past year
   ☐ Within the past 2 years
   ☐ Within the past 5 years
   ☐ 5 or more years ago
   ☐ Never

3. **During the past 12 months, was there a time when you thought you needed medical care but did not get it or delayed getting it?**
   ☐ Yes   ☐ No ➡ IF NO, GO TO QUESTION 5

4. **Why did you not get or delay getting the medical care you thought you needed? Please check all that apply.**
   ☐ The care I needed cost too much   ☐ I could not get an appointment
   ☐ My co-pay was too expensive   ☐ I did not think it was serious enough
   ☐ My deductible was too expensive   ☐ I had transportation problems
   ☐ My insurance did not cover it   ☐ Other reason: _____
   ☐ I did not have insurance

5. **How would you rate your overall level of stress?**
   ☐ High   ☐ Medium   ☐ Low

6. **During the past 30 days, for about how many days have you felt sad, blue, or depressed?** _____ days

7. **During the past 12 months, was there a time when you wanted to talk with or seek help from a health professional about emotional problems such as stress, depression, excess worrying, troubling thoughts, or emotional problems, but did not or delayed talking with someone?**
   ☐ Yes   ☐ No ➡ IF NO, GO TO QUESTION 9 ON NEXT PAGE

8. **Why did you not get or delay getting the care you thought you needed? Please check all that apply.**
   ☐ The care I needed cost too much   ☐ I could not get an appointment
   ☐ My co-pay was too expensive   ☐ I did not think it was serious enough
   ☐ My deductible was too expensive   ☐ I had transportation problems
   ☐ My insurance did not cover it   ☐ I did not know where to go
   ☐ I did not have insurance   ☐ Other reason: _____
   ☐ I was too nervous or afraid

9. **Which statement best describes the medications prescribed for you in the <u>past 6 months</u>?**

☐ I had no medications prescribed for me (GO TO QUESTION 11)

☐ I had medications prescribed for me and I filled them all (GO TO QUESTION 11)

☐ I had medications prescribed for me and I did not fill at least one of them

10. **Why did you not fill at least one prescription? Please check all that apply.**

☐ The medication I needed cost too much   ☐ I do not like taking medications

☐ My co-pay was too expensive   ☐ I did not like the side effects

☐ My deductible was too expensive   ☐ I had transportation problems

☐ My insurance did not cover it   ☐ Pharmacy services are not available in my community

☐ I did not have insurance   ☐ Other reason:

11. **Do you <u>currently</u> have any kind of health care coverage, including health insurance or government plans such as Medicaid, Medicare, or Indian Health Services?**

☐ Yes   ☐ No ➡ IF NO, GO TO QUESTION 14

12. **Is your health insurance a high deductible plan?**

☐ Yes   ☐ No

13. **Which of the following types of health insurance do you have? Please check all that apply.**

a.	Health insurance or coverage through your employer or your spouse/partner, parent, or someone else's employer	☐
b.	Health insurance or coverage bought directly by you or your family	☐
c.	Indian or Tribal Health Service	☐
d.	Medicare	☐
e.	Medicaid, Medical Assistance (MA), or Prepaid Medical Assistance Program (PMAP)	☐
f.	Minnesota Comprehensive Health Association (MCHA)	☐
g.	MinnesotaCare	☐
h.	CHAMPUS, TRICARE, or Veterans' benefits	☐
i.	Other health insurance or coverage (please specify):	☐

14. **Have you <u>ever</u> been told by a doctor or other health care professional that you have…**	**Yes**	**No**
a. Diabetes?	☐	☐
b. High blood pressure?	☐	☐
c. High blood cholesterol?	☐	☐

HEALTH HABITS

15. About how often do you drink…	Never	Occasionally but not every week	At least once per week but not daily	Once per day	More than once per day
a. Pop or soda (regular)?	☐	☐	☐	☐	☐
